OK to include Maria on the 1:15 call?

See below.

Linda

We are setting up a meeting with the company to discuss this. The state told us on Friday morning that the company told the state that the company is making GenX "intentionally" under the TSCA consent order and separately at the facility as a byproduct. It is the same chemical. We need to confirm this with the company and clarify from the company how much they are making under the consent order and how much they are making as a byproduct.

Let me check. I know there is a call tomorrow with the state and RAD to discuss GenX and drinking water issues and another planned for later this week with the company and our engineers to understand their processes and the production volume differences.

Alison and Sheila, any word on this one?

Thank you.

Hi Linda,

Welcome back!

Can OCSPP address this question?

"With regards to the statement, does it apply to both the GenX produced at the Chemours plant for use in Teflon *and* GenX produced as a by-product of the unrelated vinyl operation? There's been a great deal of confusion here about the 'two GenXs,' and why one is regulated and the other is seemingly unregulated. Our local officials are pulling their hair out trying to figure that one out."

HOLDING STATEMENT

Ex. 5 - Deliberative Process

Hello, I'm back from vacation and relaxed... Enesta, just left you a message - what are you waiting on from OSCPP?

Thanks.
